# Why CADpro™ DEFENSE MouthGuards?

Precision and Accuracy of CAD/CAM Digital Technology

CADpro™ DEFENSE, Jurim's sports mouthguards, offer excellent protection from dental trauma for every level of athlete. Compared to over-the-counter mouth guards molded at home, CADpro™ DEFENSE mouthguards are custom thermoformed to provide a better, more comfortable fit which in turn increases wear compliance which is key to preventing trauma. Additionally, CADpro™ DEFENSE mouthguards have a consistent occlusal thickness of 3-5mm ensuring an adequate cushioning effect in the event of an accident.

- Protection from potential dental trauma during sporting activities
- Better, more comfortable fit increases wear compliance
- Consistent occlusal thickness offers increased protection
- Customization option highlighting team logos and colors
