## Questions? Call to speak with Dr. Alan Jurim today!

Prior to obtaining his dental degree, Dr. Alan Jurim received his dual degree in Computer Systems Engineering and Electrical Engineering at the prestigious Rensselaer Polytechnic Institute. His strong background in engineering and computer technology has proven to be an invaluable asset in teaching many doctors and dental teams how to integrate modern dental techniques into their practice. Dr. Alan Jurim works in private practice and heads the CADpro CAD/CAM department at Jurim Dental Studio. His clinical and laboratory skills allow Dr. Jurim to provide helpful one-on-one counseling for dentists to ensure every CADpro case completed by Jurim Dental Studio is a success. Dr. Alan Jurim is a member of the American Academy of Cosmetic Dentistry and the American Society for Dental Aesthetics, and his worked has been prominently featured in CERECDoctors quarterly magazine.

### CADpro™ Temps implant provisionals

As a preferred CEREC Connect Lab, Jurim Dental Studio can work with you to provide precise-fitting CAD/CAM restorations made from the highest-quality ceramics with the artistic finish only a skilled dental technician can achieve where enhanced aesthetics and characterization is needed.

Our CADpro™ Dental state-of-the-art milling center can unlock the potential of your CEREC digital impressions to produce a myriad of advanced restorations, something no other lab can do with CEREC.
